

# Standard Pouches

Oliver-Tolas' pouches are ideal for a variety of medical device and pharmaceutical packaging applications, from large or bulky devices and kits to small or low-profile devices and components, including:

- implants
- catheters
- tubing sets
- wound care
- medical trays
- surgical instrument trays

## Pouch Capabilities

We offer a variety of value-added capabilities to assure your peel pouches and tear pouches will meet your exact specifications:

- coated or uncoated
- printed or unprinted
- chevron design peel
- corner peel
- tear notch
- rounded corner
- hang hole
- hang tabs
- thumb notches
- linear tear packaging for large or bulky devices and kits
- solid or ribbed seals
- shaped pouches
- pouches on a roll
- continuous tube

Oliver-Tolas' pouches are also available in continuous roll form compatible with automated packaging systems and in-house printers, allowing for increased throughput and reduced operating costs.

Pouches on a roll are available in the following constructions:

- three grades of DuPont™ Tyvek®/film
- paper/film
- film/film
- peelable or tear-open foil/foil

# Standard Pouches
